

Installation and configuration of FortiToken

1. **Download and installation of FortiToken Mobile** – the Fortitoken Mobile APP is available for Apple and Android and must be downloaded and installed from the respective store.
2. For Windows PC there is the possibility to install the program FortiToken from the Windows Shop on the PC.

<https://www.microsoft.com/de-de/p/fortitoken-windows/9p0tdh1j7wfz?activetab=pivot:overviewtab>

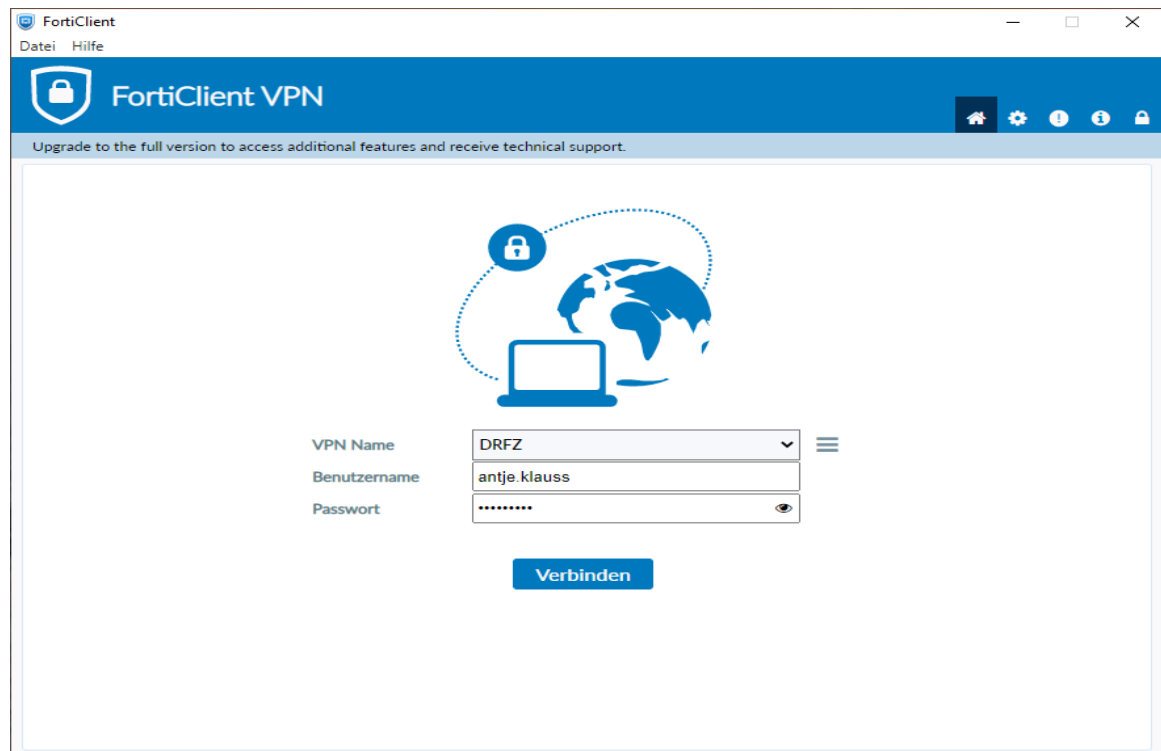

3. Configuration - start FortiToken Mobile and use the + sign to scan the QR code that have been sent from DRFZ IT to your email address.

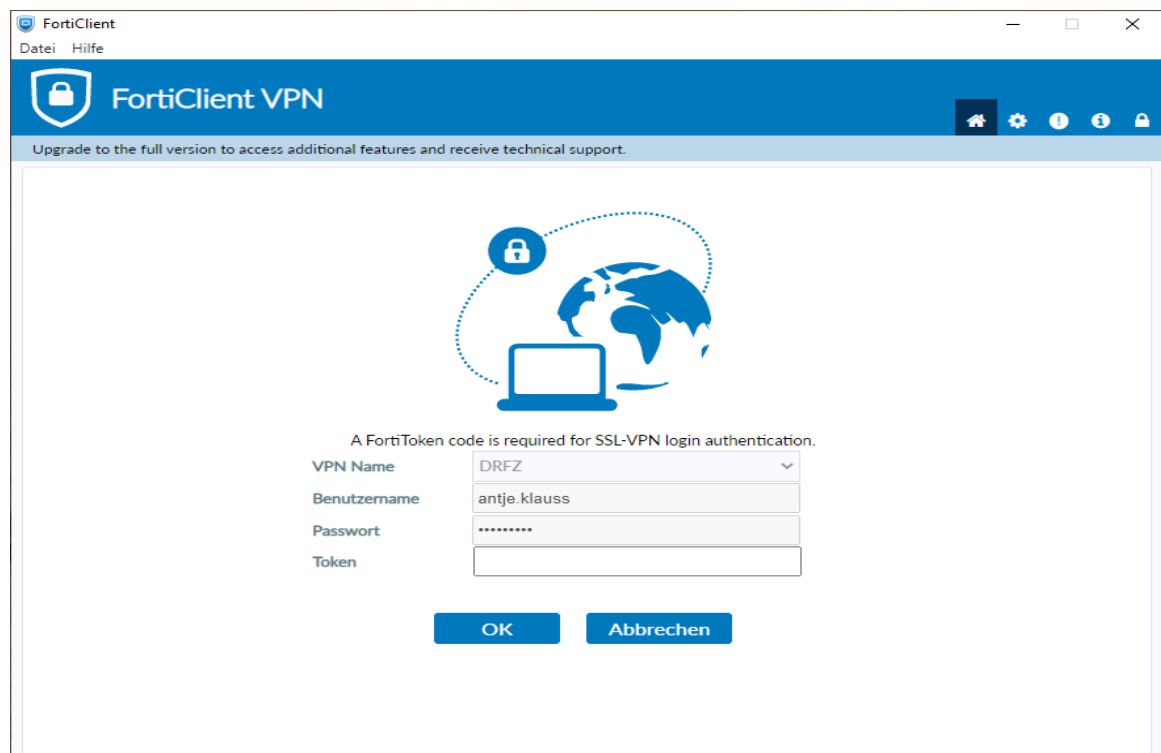

4. The token number changes every 60 seconds. It is best to wait until a new token has been generated and then enter it in the FortiClient.

Start des FortiClient

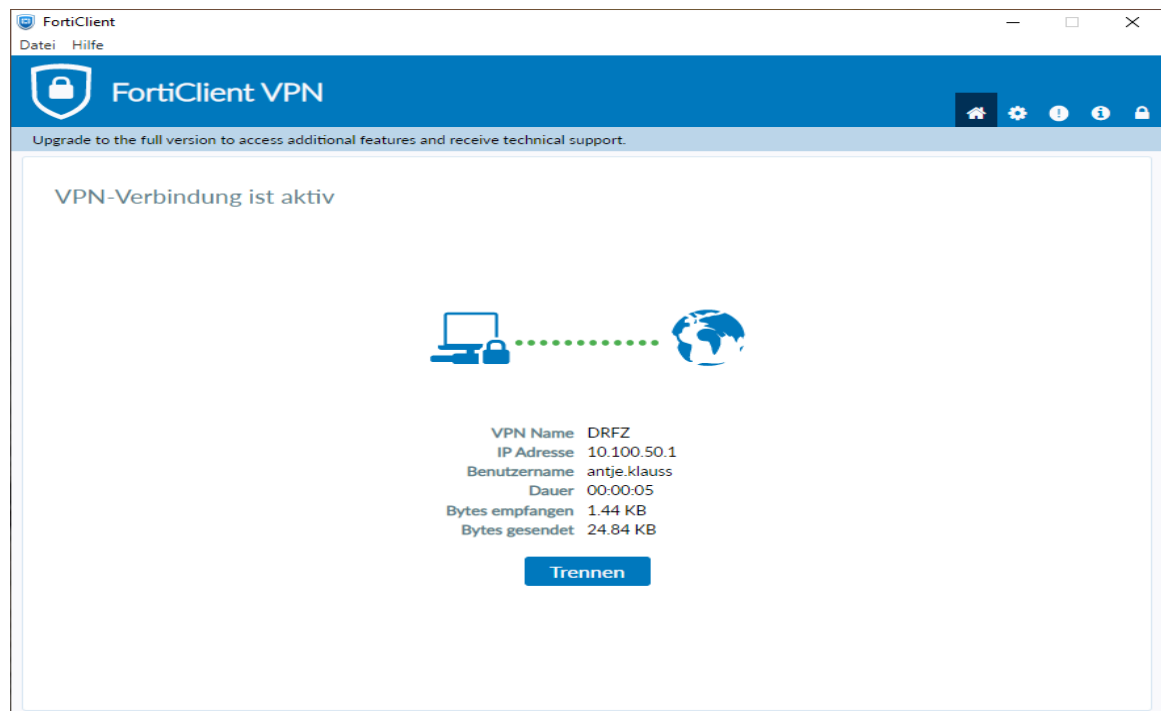

1. Type in your DRFZ Account and password and click Verbinden.

Now enter the token generated in the FortiToken Mobile APP.

The following window will then appear which can be closed then.

To disconnect, click on the FortiClient icon in the taskbar and click on Disconnect.
